

BAURINGS

MANHOLE RINGS

Grade adjustment rings are circular shaped ring sections that are used to adjust the overall height of a manhole such that the manhole lid is flush with the roadway surface.

External diameter	Internal diameter	Height	Unit weight
36"	24"	2"	80 lbs
36"	24"	3"	120 lbs
36"	24"	5"	175 lbs
40"	25"	2"	108 lbs

Benefits

- Strength and durability. Manufactured to ASTM C478 specification.
- High resistance to infiltration and leaking.
- Manhole Construction.
- Applications: Stormwater manholes. Sewer manholes
