LIGHTWEIGHT GROUND PROTECTION MATS

HDPE (high-density polyethylene) is a commonly used material for ground protection mats. It is a durable and robust thermoplastic polymer known for its strength, chemical resistance, and impact resistance. HDPE is also resistant to moisture and chemicals, making the mats suitable for use in various environments, including wet or corrosive conditions. They are also very light, making them easy to handle and transport. They often feature an interlocking design that allows for quick installation and removal, enabling rapid deployment and reconfiguration as needed.

The mats can be easily cleaned and reused, providing cost-effective and sustainable ground protection solutions.

Size
4' × 8' × 1/2"
1220×2440×12.7 mm

Weight
93 Lb
42 kg

Bearing capacity
66 Short tons
60 Metrics Tons

Loading container & calculate
320 pcs in 20' GP, 580 pcs in 40' GP
